

NAD 500 v5 NAD 750 v5 NAD 1000 v5

NAD v5 accumulation tanks may be provided with a flange with 210 mm screw spacing for a TPK heating unit installation. More than one flange may be installed. Changes in the number and location of sockets are optionally available. The flange is plugged in the basic design.

Integrated heat exchanger with the surface 1.5 m² for other heating source connection (for example solar system). Accumulation tanks are supplied with a high-quality insulation Symbio made of polyester fleece.

Maximum pressure in the tank	0.3 MPa
Maximum heating water temperature in the tank	90 °C
Maximum pressure in the exchanger	1.0 MPa
Maximum heating water temperature in the exchanger	110 °C

Socket G 1 1/2" suitable for electrical heating element upon solar heating.
